

LOADSHARE®

KITS CATALOGUE 2025

CUT MAINTENANCE COSTS NOW!

Get increased steering stability and improved ride quality from the trucks you own!

RIDE BETTER. DRIVE LONGER. COUNT ON LOADSHARE.

From Innovation to Installation

Since 1989, Loadshare Suspensions Ltd. has led the charge in redefining ride control across North America's most demanding fleets. With our trademarked Loadshare® kits and proprietary air spring technology, we've turned spring sag into a solvable science—one that now supports over **95% of heavy-duty trucks on the road today.**

Now, we're proud to present our complete line of suspension solutions. Whether you're managing front spring fatigue, tackling under-axle obstructions, or optimizing rear-end performance on straight trucks, Loadshare® kits deliver proven results, one axle at a time.

Find your
kit today.

WHAT DRIVES US

Reliability

Our customers count on dependable solutions. That's why every kit we produce is engineered to perform—and built to last.

Responsiveness

We listen. We adapt. We go the extra mile to support operators facing real-world challenges, whether they're in construction zones or on cross-country hauls.

Integrity

Since 1989, we've earned trust through transparency and performance. We don't cut corners—ever.

Customer Dedication

We believe every client deserves to be treated like royalty. From hands-on support to personalized solutions, Loadshare's commitment to the people behind the wheel is unwavering. If you've ever worked with Loadshare, you've seen it firsthand.

Innovation With Purpose

From our first kit design to today's full-spectrum solutions, we innovate where it counts most: ride quality, stability, and long-term value.

 **PROUDLY BUILT IN CANADA SINCE 1989**

CLASSIC KIT

SQUARE-TOP

Loadshare® Classic

Casted Square-Top Kit

This is the kit that started it all. Featuring a casted square-top bracket, the Loadshare® Classic Kit has earned its stripes in the harshest operating environments across North America. Known for its bulletproof design and time-tested durability, this configuration is trusted by seasoned operators and fleet managers alike. If you’ve heard of Loadshare®, chances are you’ve heard of this kit.

CLASSIC KIT

ROUND-TOP

Loadshare® Classic

Round-Top Kit

A trailblazer in Loadshare®’s product history, this round-top bracket kit represents one of our earliest solutions—designed specifically for standard front axle U-bolt configurations. It’s the go-to choice for fleets looking to upgrade performance without breaking the budget. With its entry-level cost point, this kit offers proven Loadshare® support and reliability, making it ideal for the most common front-end setups across North American vocational trucks.

HS10191	Standard	4"	Double	7-5/8"

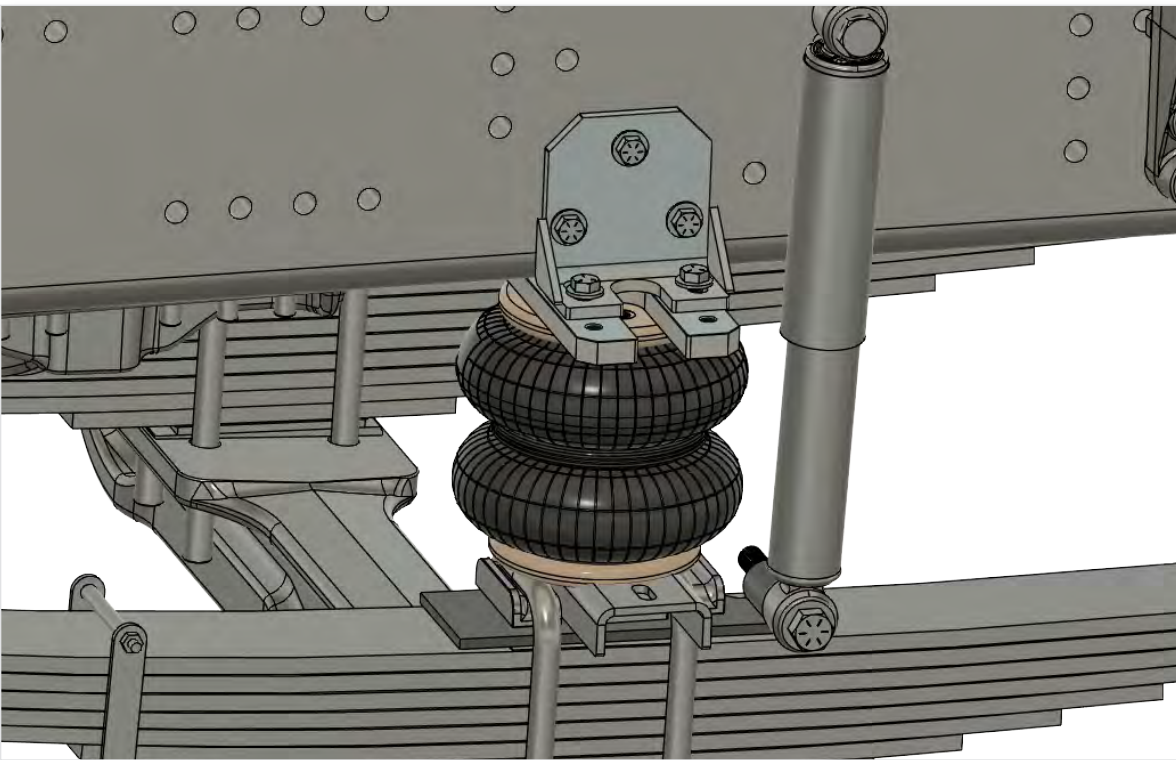

SQUARE-TOP

SQUARE-TOP

Loadshare® Square-Top Kit Series

Built for trucks outfitted with square-top U-bolts, this Loadshare® Kit Series delivers versatile suspension solutions for narrow, standard, and wide U-bolt spacing. Every kit is engineered for precise fitment and includes both single-convoluted and double-convoluted air bag configurations. For applications with reduced height clearance, our single-convoluted kits offer a compact yet durable solution. Additionally, we include 7-inch double-convoluted air bag kits, specifically designed to perform in environments with limited radial clearance—ensuring improved stability and optimized ride control across demanding applications.

REAR-OFFSET

REAR-OFFSET

Loadshare® Rear Offset Kit Series

Designed for applications where obstructions above the axle prevent direct mounting, the Loadshare® Rear Offset Kit Series provides the ideal solution by repositioning the air bag rearward from the axle. This series includes a variety of air spring configurations, featuring both **7-inch** and **9-inch double-convoluted** options, as well as **9-inch single-convoluted kits**. Whether you're dealing with tight radial or vertical clearances, these kits deliver reliable suspension support without compromising on performance. Built for durability and engineered for fitment flexibility, Rear Offset Kits help maintain ride comfort and load stability—even in the most restrictive chassis environments.

ROUND-TOP

ROUND-TOP

Loadshare® Round-Top Kit Series

Purpose-built for trucks equipped with round-top U-bolts, this Loadshare® Kit Series delivers adaptive suspension solutions for a variety of U-bolt spacing requirements—narrow, standard, and wide. It includes both single-convoluted and double-convoluted air bag configurations, ensuring compatibility with diverse installation environments. Our single-convoluted kits offer a streamlined fit for height-restricted setups, while the 7-inch double-convoluted air bag kits are engineered to provide reliable performance in applications with limited radial clearance. Whether you're upgrading ride control or fine-tuning your load support, this series combines resilience and precision for dependable results.

DUAL BAG

Loadshare® Dual Air Bag Premium Kit

For operators who demand peak suspension performance, the Loadshare® Premium Kit brings together the best of both worlds—featuring a square-top over-axle configuration combined with a rear-offset kit, this setup equips each side with two airbags for superior ride control. Included in this powerhouse system are all three of our trusted air spring configurations: 7-inch double-convoluted, 9-inch double-convoluted, and 9-inch single-convoluted air bags. The rear-offset component ensures compatibility in installations with obstructions above the axle, while the dual-bag layout delivers unmatched stability, load handling, and comfort. Though not suitable for every chassis and sometimes a bigger investment, this kit is a true standout when installed—built for professionals who want us to go the second mile, so their truck can too.

LOW PROFILE

Loadshare® Compact Clearance Kit Series

When space is at a premium, the Loadshare® Compact Clearance Kit Series steps in with precision. Designed for trucks facing extreme height or radial clearance limitations, these kits echo the rear-offset concept—but feature a single air spring configuration for maximum fitment flexibility. Available in 7-inch and 9-inch single-convoluted air bags, they're built to squeeze into the tightest setups without sacrificing performance. We've bent over backward engineering this series so your truck doesn't have to—delivering smoother rides, solid support, and real-world dependability in the most unforgiving installation scenarios.

THE BENEFITS OF AN AIR HELPER SPRING SYSTEM

Various systems have been tested under the most rugged conditions and in all cases a 100% improvement in vehicle performance was observed. Listed below are several benefits noticed when using the air bag setup.

- Eliminates leaf spring sag
- Keeps the frame level under braking
- Keeps the frame level when weight is shifted
- Keeps the frame level when auxiliary suspensions are raised
- Improves steering characteristics
- Extends the life of steering, spring, and pivot bushing components
- Improves vehicle handling
- Improves weight distribution

SHOCK KIT

Shock Relocation Kits Built for Smooth Installations

At Loadshare® Suspensions Ltd., we understand that every truck setup is unique. That's why we offer specialized Shock Relocation Kits, designed to reposition the stabilizer arm mount whenever its original placement interferes with Loadshare® kit installation. Engineered for precision and durability, these kits ensure a seamless fit without compromising the performance of your suspension system.

REAR AIR-RIDE

Loadshare® Rear Air Ride Series for Straight Trucks

Straight trucks often roll off the line without factory rear air suspension, but they still deserve premium ride quality and load control. That's why we developed the Loadshare® Rear Air Ride Series—built exclusively for rear axle applications, these kits equip two airbags per side to drastically improve stability, ride comfort, and weight distribution. Ideal for trucks facing variable payloads or inconsistent terrain, this series adds a professional-grade upgrade to the rear—complementing front suspension systems and delivering full-vehicle support for everyday performance.

How Do I Know Which Kit Fits My Truck?

- Go to loadshare.ca/truck-listings/ and search by make, model, and year.
- If your truck isn't listed, head to loadshare.ca/kit-finder.
- Enter specs: U-bolt spacing, U-bolt type, height clearance, etc.
- The Kit Finder will suggest the perfect kit.

Need help?

Our team is available weekdays 9 AM-5 PM EST (and often weekends) to guide you.

7" vs. 9" Bag Kits: Which One Should I Get?

More air equals a smoother ride.
Here's the rule of thumb:

- 9" Bag Kit: Best ride comfort and load handling when you have frame clearance.
- 7" Bag Kit: Ideal for tight spaces or special applications.

Use the Kit Finder to check clearance.

Still deciding?

Give us a call to compare specs for your setup.

What's a Rear Offset Kit and Do I Need One?

A Rear Offset Kit lets you mount the air spring away from the axle center when there's no room directly above the axle. You need it if:

- Frame rails, body mounts or other obstructions block direct mounting.
- You're installing dual bags.

Our system flags this automatically, but feel free to ask why we recommend it for your truck.

Single-Bag vs. Dual-Bag Kits: What's the Difference?

- Single-Bag Kit: One air spring per side—excellent performance and comfort.
- Dual-Bag Kit: Two air springs per side—for maximum air volume, stability, and a premium ride.

If you tow heavy loads or crave top-tier ride quality, a Dual-Bag Kit is your go-to.

Can I Lower My Truck with This Kit?

Yes. We offer a dump valve to purge air and restore your previous static ride height. For more dramatic lowering:

- Some owners remove leaf springs.
- We don't officially recommend spring removal—if you choose this route, use a certified mechanic for safety.

Should I Remove Leaf Springs When Installing?

Modifying factory suspension isn't our official advice. However, many owners remove leaves for extra drop and love the result. Always consult a certified mechanic before making that change.

What Is a Shock Mount Kit?

Also called a Shock Mount Relocation Kit, this adds brackets so your stabilizer arm clears the new air springs. You'll need one if your shock mounts:

- On the factory axle stop (which our kit replaces).
- Somewhere that interferes with the air bag's travel.

The Kit Finder recommends this for you, or send us a pic at info@loadshare.ca and we'll confirm.

WARRANTY

At Loadshare® Suspensions Ltd., exceptional customer service isn't just a promise—it's our guiding principle. We stand firmly behind every Loadshare® kit with a one-year warranty from the date of installation, because we believe in our product's quality and in your peace of mind.
